Payment by Fax, CHAX® Authorization Form

➢ CHAX® checks are safer than regular checks. When you send a CHAX® check you are providing no more information than if you mailed the check. Checks can be intercepted or lost in the mail. CHAX® are sent by fax and thus you have positive, instant confirmation of their receipt. CHAX® checks look different from regular checks and so cannot be easily cashed but must be deposited into a bank account, leaving an audit trail.

➢ You control your money. You control the float. You can send the CHAX® checks on the day you wish to release the funds. You no longer have to build in extra time to cover delays.

➢ You can eliminate the need to use expensive overnight delivery service when you have to get a check delivered in a hurry.

➢ If you have merchandise on hold for receipt of funds, you can have it shipped the same day.

➢ You can avoid COD charges and the problems of having to leave the check ready and waiting for the trucker.

➢ Using CHAX® checks instead of credit cards will not tie up your credit card's available credit and will avoid the hassles of getting reimbursed for business purchases.

➢ Keep your accounting simple. CHAX® checks are generated by you just like regular checks (you create a regular check, fax it, and retain the original for your records). If you use CHAX® instead of your credit card, you won't have to analyze and allocate the credit card account statement for tax and audit purposes.

Please accept my signature as authorization to create a CHAX® check. We have included a copy of our check # _____ in the amount of $_____. We understand that the original check should be retained for our records and should never be deposited.
